Robinson Polytunnels Price List

Issue 8

Polytunnel Specifications

Foundation Tubes

Probably the most important part of a polytunnel as far as durability is concerned. The foundation tubes are in contact with the ground, a wet and corrosive environment. Our ground tubes are heavily galvanized to resist corrosion for as long as possible and

thick-walled tube ensures strength and durability.

Bracing Bars

Bracing bars are fitted at each corner of the 'tunnel. The wind pressure on the ends of the polytunnel is transferred directly and effectively to the ground. Our bracing bars are again manufactured from high strength galvanized steel (Ø25.4 x 1.5mm).

Bolts & Fasteners

Our bolts and fasteners are either galvanized or zinc plated for resistance to corrosion in the typically damp growing environment. We source our bolts from reputable local suppliers to ensure consistent quality.

Hoops

The hoops are rolled from high strength (Z35) galvanized steel (Ø25.4 x 1.5mm). This is a high tensile steel, perfect for the manufacture of polytunnels. The hoops are designed to ensure a minimum straight side of 3'6" (1.07m) with a gentle curve allowing you to stand up straight even at the sides of the 'tunnel.

Timber End Frames

We use Tanalith treated timber for the end frames – essential for resistance to fungal attack and rot. The posts and lintel are 89 x 38mm with a double-row of 38 x 19mm battens to securely fix the polythene main cover. Our timber end frame and batten arrangement is simple, neat and

effective.

Polythene

We offer three choices of polythene with the polytunnel kits that we supply. "Clear" polythene for everyday application, "Diffused" polythene for a slightly cooler environment and "Sterilite" with UV filtering for pest and disease control. We also have a

range of replacement polythene covers, all with a 5 year guarantee against manufacturing faults and UV degradation.

Ridge Tubes

The ridge tubes are also made from the same high strength Z35 galvanized steel. Slotted together with a reduced (swaged) end, the ridge tubes join together at the intersection with the hoops with our robust, purpose-made fittings.

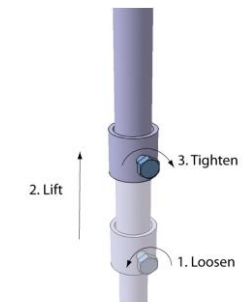

Fittings

Our fittings have been designed and tested to ensure suitability for their specific applications – not one-bracket-does-all! Virtually all our fixing brackets are manufactured in-house to give us ultimate control over the consistent quality that our

customers expect.

Tensioning / Re-tensioning System

We know that sheeting a 'tunnel well is something that comes with practise. We also know that a tight cover will perform better. For these reasons, our 'tunnels have an in-built tensioning system so that you don't have to be an expert to achieve the perfect finish.

Options for Your Polytunnel

Anti Hot Spot Tape

To prolong the life of your polythene cover, Anti Hot Spot Tape creates a thermal barrier from the steel framework. Also has a low-friction surface so your polythene sheet is easier to pull onto the framework.

Ground Cover & Pegs

Weed control fabric to cover an area the size of your polytunnel with a bit to spare. Includes 6" barbed plastic pegs to secure around the perimeter at approximately 0.5m (20") apart.

Crop Bar Kit

approximately 20% - Ideal for exposed sites.

Crop/Tie Bars are fitted to the inner hoops and are suitable for crop support and hanging baskets. They also increase the resistance to wind and snow loading by

Timber Base Rail for Both Sides

Make an easy job of fixing your polythene along the sides of the polytunnel with a Timber Base Rail. No need to dig a trench to bury the edge of the polythene with a Timber Base Rail and it

gives a much neater finish.

(Note: Ground tubes must be concreted or use "Anchor Plates" when a Base Rail is fitted.)

Timber Side Rail & Net

For additional ventilation a Side Rail & Net provide the perfect solution. Tanalith treated timber, 75 x 38mm for the side rail with 38 x 19mm battens to secure the side net and the polythene main

cover. Includes all brackets and fasteners, galvanised or electroplated for resistance to corrosion.

Roll Up Curtain

better control the environment within your polytunnel.

To close off the side ventilation when a Timber Side Rail and Net are used. Gearbox-operated drive tube rolls the polythene curtain up to open and down to close the side ventilation. Allows you to

Ground Anchor Plates

The easier alternative to trenching the polythene or concreting the ground tubes. Just dig a hole for each ground tube, pop the ground tube and anchor plate into the hole and back-fill with the soil. Provides a secure

foundation when base rails are fitted.

Single Hinged Door Kit (for Both Ends)

Our door kit includes self-assemble doors for both ends of your polytunnel. Each door is 1.82m (6ft) high x 0.85m (35½") wide, made from 42 x 38mm planed and "eased" tanalised timber with 38 x 19mm battens to secure the polythene and net. Polythene and net are supplied to clad the bottom half and top half of the doors. Include hinges, latch and all fasteners.

Overhead LDPE Spray Irrigation Kit

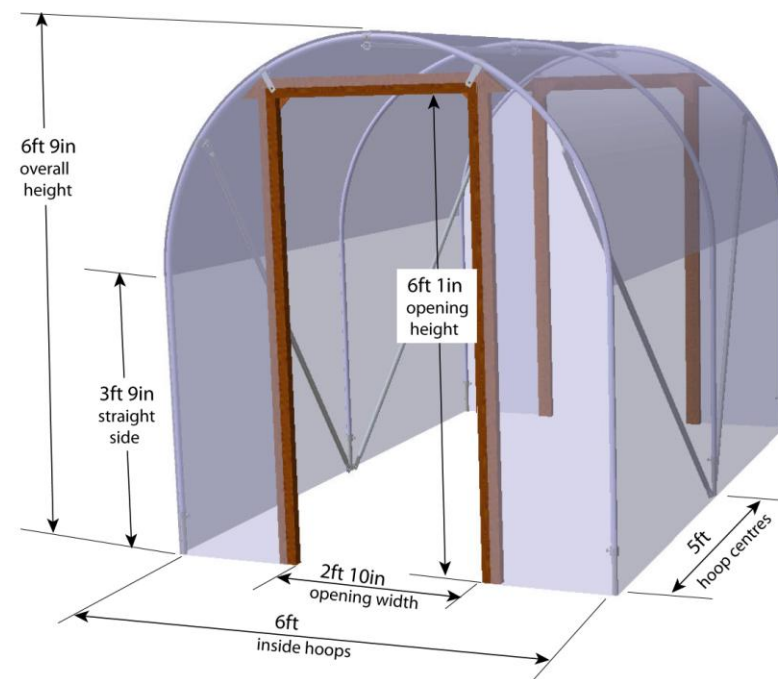

This robust irrigation kit includes:

- 20mm LDPE Main Pipes
- Pipe Cleats for fixing to the end frames
- Spray Nozzles
- Drop-Tubes ensure centred spray area
- Punch Tool for LDPE pipe
- Ball Valve to operate irrigation system
- Hose Pipe Connector

6ft Wide Polytunnels

Basic kit includes:

- Heavy duty galvanised ground tubes
- Galvanised high-strength steel framework
- Tanalised timber end frames
- Galvanised/electroplated fittings & fasteners
- Polythene tensioning/re-tensioning after sheeting
- Choice of polythene

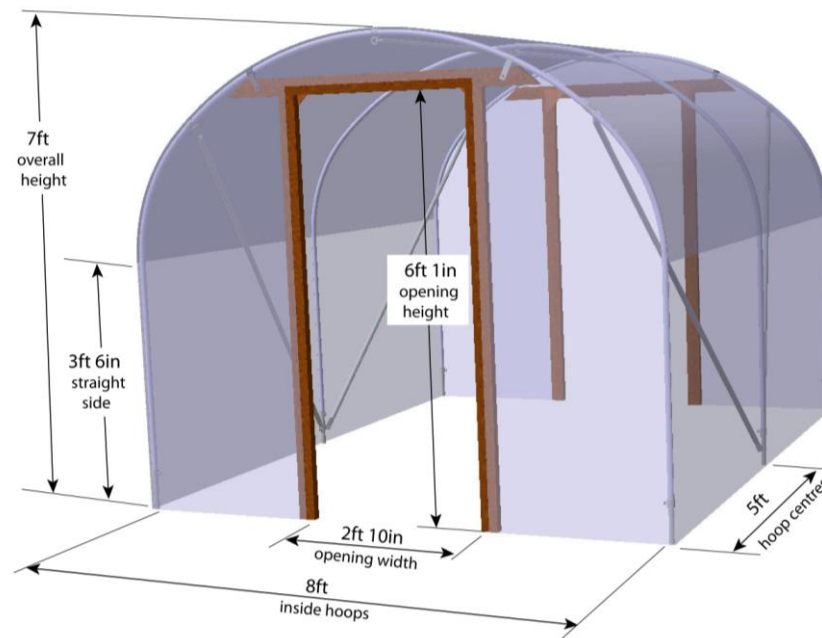

6ft WIDE POLYTUNNELS	Standard Polytunnel Kit			Anti Hot Spot Tape	Single Hinged Door (both ends)	Timber Base Rail Kit (both sides)	Ground Anchor Plates	Ground Cover & Pegs	Overhead Spray Irrigation Kit

Fruit Cages

Kit includes:

- Galvanised high-strength steel framework
- Unique tube connector design
- Ultra-strong 2m grid arrangement
- Complete door kit
- UV stabilised woven top net
- UV stabilised extruded side net
- Net fasteners
- Ground pegs

Payment & Delivery

You can order from us using the Order Form and sending your details by post, fax or email. Or you can order over the telephone. Or you can order direct from our website.

We accept payment by most major credit and debit cards or you can send a cheque.

All orders are dispatched the next working day after we receive the order. See the table below for our simple pricing.

Delivery Area	Order Value	Delivery Service	
		Next-Day	3-Day
England, Wales & Southern Scotland	up to £100	£12.50	£9.50
	over £100	N/A	FREE
Northern Scotland	all orders	N/A	£13.50

Sorry, we don't deliver beyond UK mainland.
